

Mater Private Network | Dublin

HealthCheck

Are you ready to become more proactive about your health?

HealthCheck

at Mater Private Network

Medical research has shown that lifestyle is a major contributor to many common conditions including high blood pressure, coronary heart disease, diabetes and certain cancers.

An illness once established may be treatable, but a preventative approach is preferable.

Am I suitable for a HealthCheck?

- At HealthCheck we aim to identify risk factors, signs and symptoms of common conditions, which if not detected early could result in serious health issues.
- Health assessments are suitable for people over the age of 18 who are generally well and who are interested in getting more information about how to reduce the risk of future illnesses.
- If you are undergoing or have just completed medical treatment or if you are currently under the care of a doctor, it may not be the right time to do a health assessment.

HealthCheck at Mater Private Network is a physician-led service and has been providing comprehensive health screening assessments for over 30 years.

Your visit to HealthCheck should take **less than 3 hours**.

A complete medical report will be issued to you **within two weeks of attending**; this will give you an accurate snapshot of your health on the day of attendance.

Procedures and test results are reviewed and reported on by consultants with **expertise in their relevant area**, for example, cardiology, pathology, and radiology.

Appointments are available with **male and female doctors**.
