What?

The Mater Private Bariatric Programme is a fully integrated bariatric service led by a highly experienced, Consultant Surgeon and supported by a multidisciplinary team of healthcare professionals which include Consultant Endocrinologists, Psychologists, Dietitians, and Physiotherapists. This team review every patient to determine their suitability for surgery and support them before, during and after surgery.

When?

The Surgeon will see your patient within 2 weeks from referral.

How Much?

VHI covers the procedure on certain plans. Assessed on a case by case basis by VHI. Self pay patients will pay approximately €15,000 for their in hospital stay, as well as various consultant/ Dietitian visit fees before and after surgery. This will vary from patient to patient.

How?

The Mater Private will provide your patient the highest standard of care, through the multi-disciplinary team who understands the needs of patients requiring bariatric surgery.

There are two surgery options, LSG and Roux-en-Y. The Main effect is that the amount of food the patient is able to eat is reduced. Most people will find they don't get the same feeling of hunger they did before the surgeries.

Most people lose weight quickly over the first year following surgery. On average people lose 65-75% of their excess body weight.

The comprehensive Bariatric Programme provides the emotional and physical support patients require in order to succeed and lose weight.

Who?

Mr. John Barry Conneely, B.Sc., M.Ch., F.R.C.S.I. (Gen.) joined the Mater Private as a Consultant General Surgeon specialising in Digestive Diseases. He graduated from the National University of Ireland, Galway in 2000 and subsequently completed his surgical training under the auspices of the RCSI, completing the Higher Surgical Training Programme in 2011. Following that, Mr. Conneely undertook a fellowship in Minimally-Invasive Surgery and Bariatric Surgery at the University of Toronto, followed by the completion of a two-year Fellowship in Abdominal Transplantation and Hepato-pancreato-biliary Surgical Oncology at Toronto General Hospital, where he subsequently worked as a

Consultant. His subspecialty interests encompass the entire spectrum of foregut and hepato-pancreato-biliary surgery, both in the oncology and non-oncology settings.

He is particularly passionate about the value of minimally-invasive surgery in every context and has trained extensively in the field. Dr. Conneely is committed to developing the excellent minimally-invasive surgery services at the Mater Private Hospital and is responsible for the development of the Bariatric Surgery Programme.
